Pots & Planters • Nursery Supplies

CATALOGUE 2020

ABOUT HOSCO

Horticultural Supplies Co. made its first pot in 1980, primarily because we needed pots for our own pot plants- at that time no one made plastic pots in India. Subsequently we started selling what we originally made for ourselves and this trend continues to this day.

Unlike most other pot producers, we really understand plants - all our products are tested and refined under real nursery conditions and for growing real plants at India's best nursery - Tropica Nursery LLP. All of our products are specially designed to work best under Indian conditions- tropical temperatures, high light levels, relatively cheap labour etc.

A lot of our products are for bulk production of plants - these products have been designed after years of plant production experience and then tried and tested at our sister concern - Tropica Nursery LLP - where we grow a very wide range of pot plants for local and export sales. Others are designed to be used to display plants to the best effect- again, at Tropica Nursey LLP we discovered that spending a little extra on a better pot gave us much better sales and often also pricing, easily covering the extra spend.

Almost all our pots are made of 100% recycled plastic, making them super Eco-Friendly. Using selected material from trusted sources, high quality U.V. stabilisers and the best pigments, we are able to give you superior products. Our Terra Cotta colour will not fade in the sun like most others do.

Bulk Purchase:

Our prices are for wholesale quantities but when your requirements is in bulk (1000's of each item) we offer special prices - contact us and you will be surprised at the very competitive pricing we offer bulk buyers.

Contract Production:

We can design pots, drippers or other plastic articles as per your design- please feel free to contact us if you need anything different in large numbers.

Please check out more details on our products at www.hoscoindia.com and more about our plants at www.tropicanursery.com

POTS & PLANTERS

HOSCO has been selling plastic Pots and Planters since 1983; what initially started as fulfilling a personal requirement soon lead to sales to other growers and nurseries. At that time there were no other manufacturers of plastic pots in India.

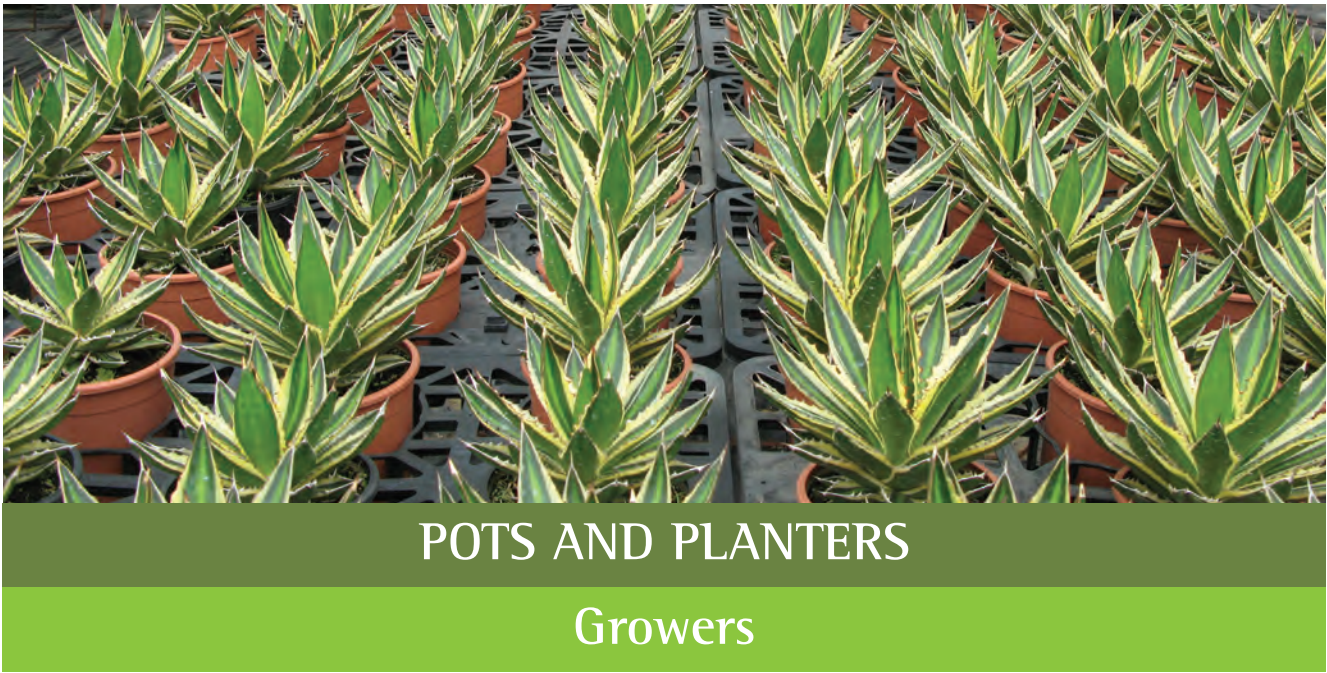

Almost all our Pots and Planters, with a few exceptions, are made from 100% recycled Polypropylene. Over the years we have developed close relationships with recycled plastic raw material suppliers so we get reliable quality raw material that lasts; we have optimized the UV stabilizers and pigments suitable for such materials so that our pots last well over 5 years in our hot tropical sun and can be reused many times over. Our Terra Cotta pots do not fade even in full sun for years. We make the best quality pots in India and we make every pot we sell – no trading, no imports.

Product design flows from our 40 years of experience of growing plants at our sister concern, Tropica Nursery LLP (Formerly Tropica Nursery Pvt Ltd). Our pots are typically built thick walled and strong; they feature excellent drainage; they have strong rims and other features that make them a very suitable choice for growers. They are professionally made pots for professional nurserymen and serious growers.

We continue to make innovative designs; some are practical, for large scale nursery production, such as the SQ60 and SQ80 pots in combination with the MP Trays for holding them. Others are conventional Pots, like our Euro Series. Still others are fancier Planters, such as the new Bonzi Range: great for Bonsai training, of course, but also very attractive as general purpose pots. Use of these pots greatly increases the plants perceived value and so sales and pricing are both enhanced.

All our Pots and Planters are conceived and tested and then modified as needed at Tropica Nursery LLP. We use very large numbers of pots for large scale plant production and, more and more, we use higher quality Pots & Planters for our Premium plants to get best value for these plants and make them easy to sell on for our customers.

Going ahead we will continue to produce new Pots and Planters that serve the needs of Nurserymen everywhere; better quality, expanded range and superior design will continue to be our hall marks.

Corfu Pot Large	30.0 cm	19 cm	8.0 L

Note: Saucers are sold separately

Pots (without hangers)

- Corfu hanging Pots can also be used as regular pots without Hangers.

Integral Saucer

How it works

- Hanging baskets tend to dry out rapidly. Also, excess water coming down from baskets is a nuisance. Integral saucers cover both issues and are invisible too! Both water and fertilizer in it is recycled- this helps plant growth and reduces environmental harm. Extreme amounts of water such as rain can still escape without flooding the root ball.

Available Colours: BL  TC  WT 

LILYPON BOWLS

- Comes without holes - for Water Lilies, fish etc.
- DRILL drainage holes when using as planter
- Range of sizes including very large 62 cm size
- Very attractive form, complements all plants
- Use with specimen plants or mass planting of annuals

- Waters through built in reservoir to give healthy plants
- Low maintenance pot plants for indoor and balcony
- Available in two sizes

Code	Top Dia	Bottom Dia	Height	Volume
Oasis Small	10 cm	8 cm	11 cm	0.6 L
Oasis Medium	13 cm	11 cm	14.5 cm	1.2 L

Available Colours: WT ☐

Planting Instructions

- Before planting fill central well with coco-peat and press it to compact
- Planting: Fit the black water tube into its connector and then place the plant into the pot and plant as usual- use of a soil-less media is highly recommended for all self-watering pots.
- Initially, water from the top, wetting the whole mass of growing media and allowing water to collect in the reservoir below. Repeat this procedure for next 3-4 waterings. If the water comes out discoloured, discard and clean reservoir cup.
- Subsequently, start watering through the watering tube. This way only clean fresh water will collect in the transparent reservoir cup.

ATHENA

- Classic yet contemporary Greek design
- Textured surface and etched design
- Can be used with Snap-On or wire hangers

H-pots used with H-trays

Aloe 'Tiki' in H-Pot #4

H-Trays placed on low cost wire benches to form a long lasting bench for small pots: Easy holding, Easy spacing, Easy counting.
On selling: Easy shipping and in Shops: Easy Display!
Trays are painted white to reflect light onto lower leaves, reduce heating and to prolong tray life.

NURSERY SUPPLIES

There are any number of plastic pot manufacturers in India but few manufacturers specializing in Nursery Supplies. This covers a huge range of products besides pots that a Production Nursery needs. As owners of a large, top quality nursery - Tropica Nursery LLP (Formerly Tropica Nursery Pvt Ltd) we have always needed various trays, irrigation materials, high quality labels and now, Trolleys for large scale plant production and over the years we have developed most of these needs ourselves, through HOSCO.

All these items have been designed keeping in mind our needs at the nursery - this automatically makes our products very suitable for Indian conditions - tolerant of heat and sun; suitable for hand watering and hand planting where labor costs are relatively low; super long lasting so per-use costs are bare minimum. Many of our trays, for example, are in use with us and others for over 10 years.

Our Perma Plug Trays have been very successful but after years of use we realized they could be substantially improved; hence we developed the New Perma Plug Trays. These are superior in many ways to the old but more than that they are the need of the hour. These New Perma Plug Trays will last a decade or more while giving superior root systems and sturdier plants, better handling and allow use of low-cost GI wire benching. If you are looking for a Sustainable, Eco-Friendly Plant Propagation System, the New Perma Plug Trays in combination with SQ60 and SQ80 pots with their respective MP Trays are hard to beat.

While transporting plants between the various locations of Tropica Nursery LLP (Formerly Tropica Nursery Pvt Ltd) we felt the need for collapsible trolleys and so we made the HOSCO Trolley - based on the Danish Trolley but modified with mesh shelves to allow air movement and some cooling in transit and other small modification. We find that a vehicle using these HOSCO Trolleys can carry 50% more plants with less leaf damage than using plastic crates and loading/unloading takes just minutes!

And with the HOSCO Trolley you can buy the Display Kit which allows you to turn the normal Trolley into a simple but very practical Display System for exhibitions and for Wholesale and Retail plant outlets.

We continue to develop new Nursery Supply products and hope to offer a much wider range in the near future.

NURSERY SUPPLIES

Trays

MULTIPURPOSE TRAYS

Empty MP Tray

Sq. 60 fits 40 pots
per MP Tray

Sq. 80 fits 24 pots
per MP Tray

- Extra strong tray with open grid base
- Made of tough polypropylene co-polymer for long use
- Great for handling pots, plants and materials in nurseries

Code	Length	Width	Height
MP Tray	55 cm	36 cm	7.5 cm

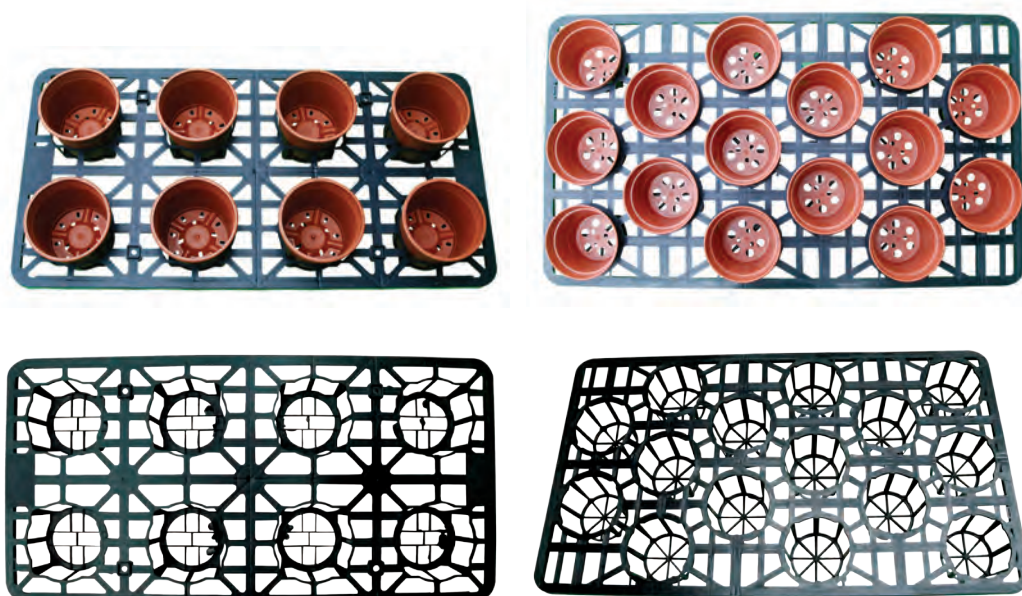

Available Colours: BL 

Item	Per MP Tray
SQ 60	40 nos
SQ 80	24 nos
SQ 100	15 nos
PT 4	15 nos
PT 5	10 nos

Item	Per MP Tray
EU #2	15 nos
EU #3	12 nos
Sonoma	09 nos
PP 100	100 cells
PP 150	150 cells
PP 200	200 cells

Multipurpose Trays are essential for a modern mass- production nursery, where they have numerous uses. Table shows how many of different pots sizes a Multi-Purpose Tray will hold. Multipurpose Trays are designed to be used as a long lasting, no-corroding bench top - 3 rows of trays form a standard 165 cm wide (approx. 5 feet) nursery bench using GI wire or wire rope as the supports.

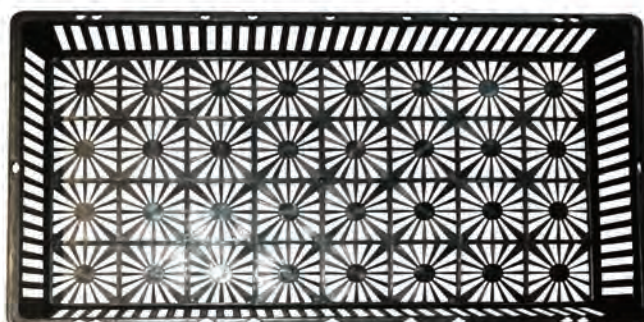

Spacing Trays:

- These are designed to space, hold and carry pots
- These trays provide extra space between pots especially for tropical conditions
- Hold pots securely under windy conditions
- Handle, count and move 8 / 15 pots at a time
- Use on ground or easily form a 165 cm (approx. 5 ft) bench using GI wire or wire rope

Code	Length	Width	Height	No. of Pots Per Tray	Pot Size
Spacing Tray #2	79.5 cm	45.0 cm	7.5 cm	15	VDE 4 or Similar
Spacing Tray #3	76.0 cm	38.0 cm	7.0 cm	8	EU #3.5, EU #3 or Similar

NEW MULTIPURPOSE TRAYS

- Designed as a much lower cost alternative to the older tray.
- Bottom grid that allows the grower to fill it directly with growing media to sow seeds or root cuttings.
- Designed so that 4 trays fit in a standard CC Trolley shelf for easy handling and transportation.
- All our New Perma Plug Trays fit onto the New MP Tray so that the whole set is easily transported to and from rooting chambers.

Code	New	Item	Fits
Length	56 cm	PP 60	5 nos per New MP Tray
Width	31 cm	PP 88	4 nos per New MP Tray
Height	8 cm	PP 136	4 nos per New MP Tray

NEW PERMA PLUG TRAYS

We made the old award winning Perma Plug Trays in 1990 and it's being used extensively by us as well as other growers, especially high value vegetable farmers.

The heavy duty, long lasting Multiuse Perma Plug system can be used and reused almost indefinitely – we have been using the same trays from over 10 years. A perfectly environmentally friendly system compared to thin “Single Use” trays that seem cheap but are actually costly on a per use basis and give poor root systems.

After so many years of use we decided to incorporate all our experience and expertise to improve the Perma Plug System in many ways:

- Square shaped cells – Greater surface area and bigger media volume
- Better spacing between cells due to triangular spacing (except PP60)
- Same or better number of cells per square feet while maintaining cell volume – Space Saving
- Flow channels to give uniform water distribution when watering
- Air flow holes to allow air movement within leaves for faster drying so less disease issues
- Even stronger, sturdier construction for long life and easy handling while planting and use
- Larger, round hole at bottom for better air root pruning and easy pushing out of root ball with rod
- Fits into NEW Multipurpose Tray – cheaper tray which fits perfectly 4 to a Danish Trolley shelf.
- New system to lock PP Inserts onto NEW MP Tray which also allows fixing of Arrow labels to tray

PP 136

PP 88

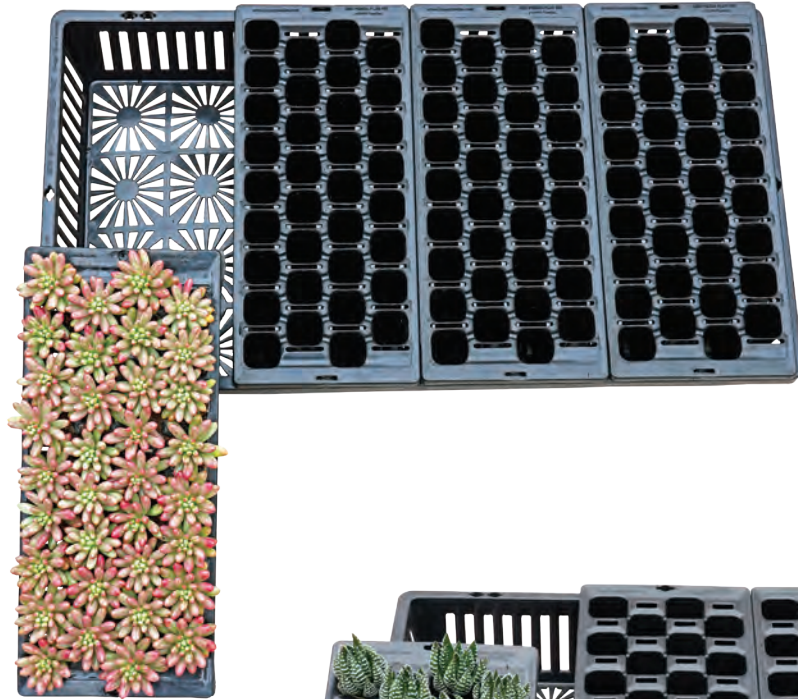

PP 60

The NEW Perma Plug system is a great help in raising seedlings and cuttings of a wide range of plants. We use them to raise seedlings, to root a wide range of cuttings and to start small succulent offsets and pups.

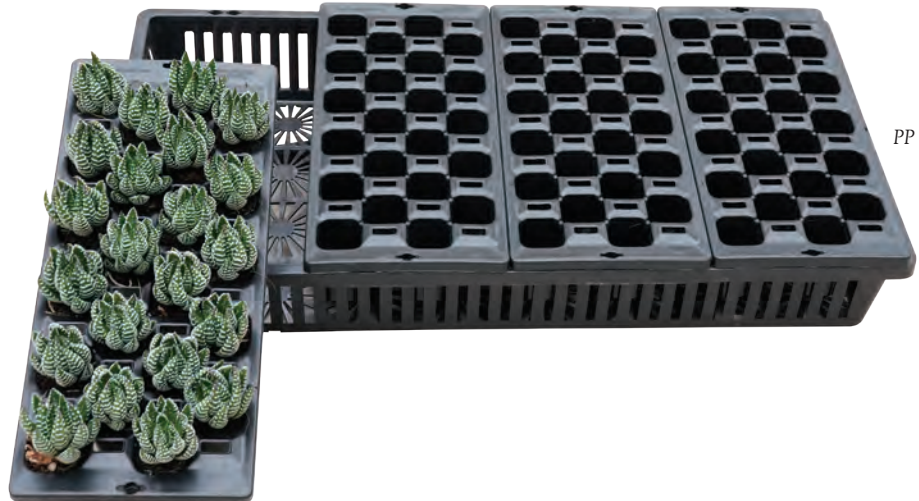

Where seedlings and rooted cuttings are being used in-house the NEW Perma Plug System is the most environmentally friendly, cost effective and technically as well as practically superior system for plant propagation.

Small Cells (PP-200): 200 cells per tray

- Suitable for smaller seedlings such as Chinese cabbage, herbs, petunia etc.
- Will give 100 plugs per sq.ft. of bench space.

Medium Cells (PP-150): 150 cells per tray

- Suitable for general purpose use such as lettuce, brinjal etc.
- Will give 75 plugs per sq.ft. Of bench space.

Large Cells (PP-100):100 cells per tray

- Suitable for large vigorous seedlings such as tomato, watermelon, papaya etc.
- Will give 50 plugs per sq.ft. of bench space.

Large growers of Exotic vegetables use our Perma Plug Trays from last 10 years. Simple benching keeps tray off ground and reduces disease.

Ornamental tissue-culture plugs - air pruning gives superior roots, allowing plugs to be pulled without using net pots.

H-TRAYS (HOLDING TRAYS)

Modern pot plant production cannot happen without some sort of holding trays to hold small pots during production, dispatch and transport.

We designed the H-Trays to be robust, strong and long lasting – very environmentally friendly compared to cheap, thin vacuum formed trays. Even though a little expensive to start with, they last a very long time so per use cost is actually lower.

- Very strong and sturdy
- Long lasting so per use cost is fraction of cheap, thin vacuum formed trays
- Easily used on low cost wire benches to form a very practical bench to hold small pots
- Excellent for production as well as transport and for retail display of the pot plants
- Holds not only Hermes pots but also other similar pots and square pots for large scale plant production

H-Tray #1

H-Tray #2

H-Tray #3

H-Tray #4

SQ60 in H-Tray #1 - 28 pots per tray

Product	Length	Width	Height	Pots Per Tray	Pots Which Will Fit
H - Tray #1	55.5 cm	31 cm	4.5 cm	28	H #1, SQ 60
H - Tray #2	55.5 cm	25 cm	5.5 cm	17	H #2
H - Tray #3	56.5 cm	31.5 cm	6.5 cm	14	H #3, SQ 80
H - Tray #4	41.5 cm	28 cm	8.0 cm	6	H #4, PT 4, VDE Pots

NURSERY SUPPLIES

Irrigation

WATERING WANDS

Advantages of Watering with a Wand

- Breaks up high pressure flow to give gentle shower
- Enables watering without washing out soil from pots, beds, etc.
- No reduction in water flow-allows fast watering
- Permits use of higher pressure pumps, also speeding watering

Original Watering Wand

- Standard time tested design
- Sturdy Engineering plastic construction
- Built in filter

Laser Wands

- Hardened Stainless Steel Front Mesh can be opened for cleaning.
- Extra Uniform, soft flow from up to 1000 laser drilled holes.
- Blue Laser with regular holes & Red Laser with 1000 ultra fine holes; 3/4 inch hose fittings
- Junior models with small heads for low pressure residential systems, with 1/2 inch hose fitting

Code	Description	Hose
Red Laser	1000 Ultra Fine Holes	3/4"
Blue Laser	Regular Holes	3/4"
Red Junior	Small Head for Low Pressure	1/2"
Blue Junior	Small Head for Low Pressure	1/2"
Watering Wand ABS	Original Design	3/4"

DRIPPERS & IRRIGATION

Adjustable Variflow Drippers

Flag Drippers - 8 LPH

- We offer several irrigation drippers and accessories in bulk
- Primarily meant for export
- Good quality products at very competitive rates
- Other drippers and accessories for pot irrigation available
- We specialize in custom manufacture as per your design

NURSERY SUPPLIES

Material Handling

PLANT TROLLEYS

These Hosco Trolleys are a basic requirement for moving plants, materials and equipment within greenhouses and around nurseries. They are also very suitable for transportation of plants on tempos/trucks as they can be folded for return journey.

Comes with 5 shelves plus one bottom (base shelf). Vertical poles with slots allow full adjustment of shelf location depending on plant height.

Made in India to European standards – high quality steel with the whole hot dipped galvanized after fabrication for long life. Rexello coasters with easy replacement bolts. Mesh shelves for air movement and long life.

A video showing the process is available on YouTube at: <http://bit.ly/hosco-yt>

Accessories

PLANT LABELS

- UV Stabilized for long life
- Write easily with pencil on etched surface
- In white & mixed color packets of 25pcs & 100pcs
- Arrow labels in sheets of 10- tear or cut apart
- Arrow labels can be tied to plant or inserted in pot

Write on with ordinary pencil

Arrow Label - Tear or Cut apart easily

Code	Writing Area	Height
Arrow labels	2.0 cm x 6.0 cm	11 cm
T Labels 15 cm	5.5 cm x 3.5 cm	15 cm
T labels 25 cm	7.5 cm x 4.0 cm	25 cm
T labels 35 cm	9.5 cm x 6.5 cm	35 cm

TERMS & CONDITIONS

- Minimum Order value = Rs.10,000/- (BEFORE Tax and Packing charges).
- TAXES: GST @ 18% will be applicable. NOTE - It is essential to provide us with your GST / PAN numbers (applicable for all orders)
- PAYMENT: 100% Advance Payment is required. Goods will typically be dispatched within 2-3 days after payment reflects in our account
- PACKING & TRANSPORT: We charge extra for packing @ Rs.150/- per box.

Transport is charged at actuals. Our responsibility ceases once goods are delivered to transporter or loaded on train.

Please contact us immediately in case of any delay or discrepancies in the parcels. We are happy to follow-up on transport problems and issues on your behalf at our end

- IMPORTANT: Collection of goods from Transporter/ Train station and/or off-loading of goods from vehicle is entirely the responsibility of the buyer at all times.
- VALIDITY: Proforma once prepared will be valid for 10 days from issue date.
- BREAKAGE & DAMAGE: To keep prices low and to protect the environment, almost all our pots are made from recycled plastic. Due to this, occasional pots may break in transit or in use due to rough handling. We DO NOT replace such pots - it is possible to make unbreakable pots, but each such pot will cost 50% more. It is better to accept a small percentage of breakage. Most such pots are still useable in practice.

ALL CORRESPONDENCE/ ORDERS PREFERRED IN WRITING VIA E-MAIL

- * Latest Price-List will prevail. All prices are subject to change without notice.
- * Prices are ex-godown and all taxes are extra as applicable at time of billing.

Acceptance and placement of orders implies acceptance of all our Terms & Conditions, without recourse.

IN CASE OF DISPUTE, OUR DECISION IS FINAL. IN CASE OF LITIGATION, MUMBAI JURISDICTION WILL PREVAIL
